Build Your Custom Pack with these Simple Steps

1. Determine your component list, including Storz® Ophthalmics Single-Use Instrumentation, B+L Ocudrapes and Laseredge disposable knives.

2. Contact B+L Customer Service at 800-338-2020 to initiate a quote.

3. A B+L Custom Packs Coordinator will review the request and work with you to ensure you are getting the best products at the best possible procedural price.

4. Once your Custom Designed Pack is finalized, begin receiving your inventory and spend less on handling and inventory control issues encountered when dealing with multiple suppliers.

Optisol-GS

Catalog # | Description
--- | ---
12/box | 4°C corneal preservation medium. Permits up to 14 days preservation. Glass vials of 20mL each. Buffered tissue culture media. Medium is serum free and does not contain any bovine originating components.

IVC-12 | Designed especially to reduce the possibility of tissue damage and contamination, and facilitate slit lamp and specular microscopic examination of the epithelium and endothelium. Clear viewing chamber permits easy anterior and posterior visualization of the whole cornea. Large anterior viewing window design permits wider slit lamp swing. Designed and engineered in conjunction with the Eye Bank Association of America (EBAA) and Tissue Banks International (TBI). Manufactured of durable, 100% biocompatible PMMA, to minimize potential breakage.
